1. Getting Started

1.1 Install the Wordpress

Please go to <http://wordpress.org> and download the current version of WordPress. For information on how to install a WordPress Platform, please see the WordPress codex page http://codex.wordpress.org/Installing_WordPress.

1.2 Install the Theme

When you are ready to install a theme, you must first upload the theme to your WordPress directory. There are two ways you can install the theme:

- Using FTP: By using any FTP program of your choice you can upload the non- zipped folder to the [/wp-content/themes/](#) folder on your server.
- Using WordPress: Navigate to [Appearance > Themes > Install Themes](#). Go to upload and select the zipped theme folder and hit install now and theme will be uploaded and installed.

Once you have uploaded the theme, you need to active it. To activate your new theme, go to [Appearance > Themes](#) and activate your chosen theme.

1.2.1 Install the required plugins

After you activated the theme, you will get notification says about what plugins you need install.

This theme requires the following plugins: [Basic User Avatars](#), [Easy Digital Downloads](#) and [Piklist](#).
[Begin installing plugins](#) | [Dismiss this notice](#)

Click on the “[Begin installing plugins](#)” link to begin the installation. Once you install the plugins, please return to the plugins list, and activate it. That’s it, you should be good to go.

1.3 Import Dummy Data

Import the dummy data for quick start using the theme.

1.3.1 Import Content data

Install the WordPress importer to import posts, pages, comments, custom fields, categories, and tags from a WordPress export file.

Follow these steps:

1. Log in to that site as an administrator.
2. Go to [Tools > Import](#) in the WordPress admin panel.
3. Install the "WordPress" importer from the list.
4. Activate & Run Importer.
5. Upload the “[dummy/content.xml](#)” file using the form provided on that page.
6. You will first be asked to map the authors in this export file to users on the site. For each author, you may choose to map to an existing user on the site or to create a new user.
7. WordPress will then import each of the posts, pages, comments, categories, etc.

1.3.2 Import the Widgets data

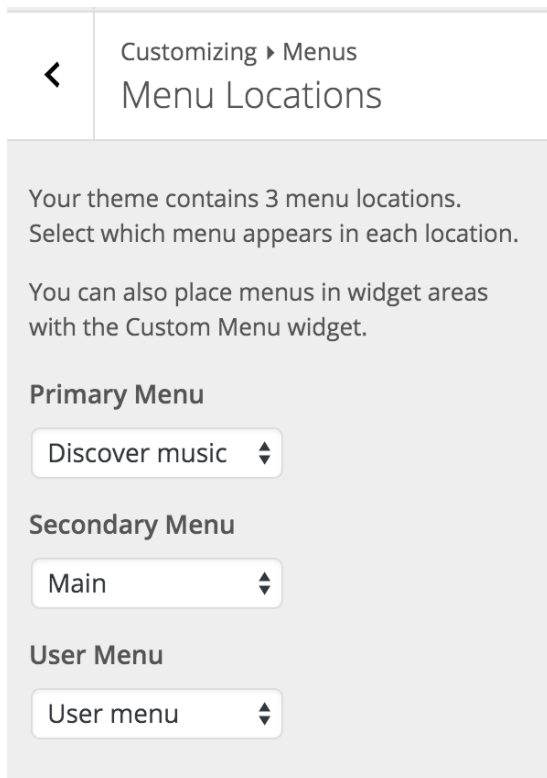

You need install a plugin [here](#) and upload “dummy/widgets.wie” file to import the widgets data

1.4 Config the menu and front page

After imported the content.xml and widgets.wie, you need config the menu and home page to make the site looks like the live demo.

go to “Appearance > Customize” page.

go to “Menus > Menu location”, choose the menu for each menu location.

back to “Appearance > Customize”, go to “Static Front Page”, choose “A static page” and select “Discover” for “Front page”

The screenshot shows the WordPress 'Customizing Static Front Page' settings panel. At the top, there is a back arrow and the text 'Customizing Static Front Page'. Below this, a message states 'Your theme supports a static front page.' The 'Front page displays' section has two radio button options: 'Your latest posts' (unselected) and 'A static page' (selected). The 'Front page' section features a dropdown menu with 'Discover' selected. The 'Posts page' section features a dropdown menu with '— Select —' selected.

Category Template
Category Masonry

2.4 Localization

You can use the [“languages/musik.pot”](#) file for localization, Install a translate plugin like [“Loco Translate”](#) to translate Wordpress plugins and themes directly in your browser.

3. Manage Musics

This theme use [Easy Digital Download](#) Wordpress plugin for selling single or bundle music files. for how to use the Easy Digital Download, you can visit the official site for more information.

3.1 Manage music

Go to [Musics > All musics](#) to manage the music. [Musics > Add new](#) to create a new one.

3.2 Manage Genres

Go to [Musics > Genres](#) to manage the genres.

3.3 Manage Artist

Go to [Musics > Artists](#) to manage the artists. and you can add photo for the artist.

3.4 Audio preview file

When create a new music you can set the preview files. you can set a mp3 or ogg file or both format files.

3.4.1 Local preview file

select “single” type and choose “Local”, click the “Add Media” to add preview file

The screenshot shows a form titled "Music Fields" with the following fields and options:

- Type:** A dropdown menu set to "Single". Below it, a note reads: "Default is single, select bundle when this is a bundle product."
- Preview:** A dropdown menu set to "Local".
- Preview file:** A section with a note: "Preview audio file, you can add mp3, ogg, mp4 file(s)". It contains an "Add Media" button and two file selection cards. Each card has a document icon, a filename, and a checked checkbox in the top right corner.
 - File 1: "TSP-01-Cro_magnon_man.ogg"
 - File 2: "TSP-01-Cro_magnon_man.mp3"

3.4.2 Remote preview file

Choose “Remote” and select the preview file “format” and input the remove file “URL”.

The screenshot shows the 'Music Fields' meta box. It has three main sections: 'Type' with a dropdown set to 'Single' and a note 'Default is single, select bundle when this is a bundle product.'; 'Preview' with a dropdown set to 'Remote'; and 'Preview file' with a sub-section for 'Format' set to 'URL', a dropdown set to 'mp3', and a text input field containing 'http://listen.radionomy.com/abc-jazz'. There are also minus and plus buttons next to the URL field.

3.5 Create an Album

When you create a music post. choose “Bundle” for the product type options and select the “Bundled Musics” for this album.

The screenshot shows the 'Music Files' meta box. It has two main sections: 'Product Type Options' with a dropdown set to 'Bundle' and the text 'Select a product type'; and 'Bundled Musics' which is a list of five items: 'Bubble', 'Hidden', 'Lentement', 'Lismore', and 'Stirring of a fool', each with a close button (x).

also select the “Bundle” for the “Type” in “Music Fields” meta box.

The screenshot shows the 'Music Fields' meta box with the 'Type' dropdown set to 'Bundle'. The note 'Default is single, select bundle when this is a bundle product.' is visible below the dropdown.

3.6 SoundCloud stream

Start 1.3 version. you just need input the SoundCloud trackid to play a soundcloud stream.

First you need a client id from <http://developers.soundcloud.com/>

How to get a clientid from soundcloud.

if you do not have an soundcloud account. you can register one. then go to <http://soundcloud.com/you/apps/new> to add a new app with your website url, then you can get a client id.

Back to your Wordpress dashboard. go to “Appearance > Customise > Misc” input your soundcloud clientid and save.

How to get a soundcloud track id.

You can find the track id by this link

https://api.soundcloud.com/resolve.json?url=THE_URL&client_id=YOUR_CLIENTID

eg.

<https://soundcloud.com/trevorgoodrum-1/country-girl-shake-it-for-me>

You can find the trackid by open below url in browser

https://api.soundcloud.com/resolve.json?url=https://soundcloud.com/trevorgoodrum-1/country-girl-shake-it-for-me&client_id=a10d44d431ad52868f1bce6d36f5234c

you got this

https://api.soundcloud.com/tracks/85205433.json?client_id=a10d44d431ad52868f1bce6d36f5234c

the 85205433 is the tracked

How to create a SoundCloud stream music post

go to “Musics > Add New”

Input the title, content and select the Artist.

In the “Music Fields”, fill the “trackid” in the soundcloud trackid field, then publish it.

Soundcloud Trackid

4. Player

4.1 jPlayer

We use [jPlayer](#) for play the music. The jQuery HTML5 Audio / Video Library

4.2 Playlist and History

You can play music when you click one. and added into playlist, also saved to browser local storage. you will not lose the data when you switch to another page.
